### HOW WOULD YOU HELP A NEW CLIENT GET STARTED IN THE BUILDING/ REMODELING PROCESS?

**B**efore home plans are designed and a hammer is swung, it is best to solidify your team of professionals for your project; builder, architect, interior designer, landscaper, or design/build. Your builder should have a qualified team of project managers, site superintendents, accounts payable/receivable, and design professionals supporting you and your project.

If truly comparing apples to apples in project costs between different builders, there should be a minuscule difference in final costs. Therefore, determining your trusted team from the beginning is the best choice.

At Hendel Homes, we help you understand your options and the building process, create a pre-construction schedule leading up to the start of the project, advise in design, and provide a comprehensive list of referrals confirming our expertise.
